		Application No.	Applicant(s)				
		10/083,890	VENKITARAMAN ET AL.				
	Office Action Summary	Examiner	Art Unit				
		Kevin C. Harper	2666				
	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status							
1)[🛛	Responsive to communication(s) filed on 19 Ja	nuary 2005.					
	This action is FINAL . 2b) This action is non-final.						
3)	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is						
	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Dispositi	on of Claims

Art Unit: 2666

Response to Arguments

Applicant's arguments filed January 19, 2005 have been fully considered but they are not persuasive. Applicant argued that the combination of Markki and Malki does not disclose the mobile node maintaining a binding list when the mobile network is a home network of the mobile node. However, in Markki the mobile node has a care-of-address to be reached through the mobile router (para. 6) when the mobile router is at the home network of the mobile node (para. 47, lines 1-2). Yet, Markki does not specifically disclose the mobile node maintaining a binding list. Malki teaches the mobile node maintaining binding update list (para. 54, last nine lines; para. 55, lines 1-3; para. 56, lines 1-3) in achieving seamless and faster handoffs. Thus, the combination of Markki and Malki teaches a mobile node maintaining a binding update when the mobile network is the home network of the mobile node.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 16, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Markki et al. (US 2003/0117965) in view of Malki et al. (US 2001/0046223).

1. Regarding claims 16 and 19, Markki discloses in a communication system supporting mobile IP (abstract, lines 1-2), where a mobile node (fig. 1, MN) connects to a network infrastructure (internet) via a gateway router (router represented by a circled "X" connecting the MN to the internet), a method comprising the mobile node attaching to a mobile gateway router (fig. 2, item 115) associated with a mobile network which is a home network of the mobile node (para. 47, lines 1-2). However, Markki does not disclose the mobile node determining that it is

attached to the mobile gateway router, determining a home address of the mobile gateway router, obtaining a care-of-address comprising the home address of the mobile gateway router, sending the care-of-address to the home agent of the mobile node, and maintaining a binding update list of correspondent nodes that the mobile node has been communicating with. Malki discloses a mobile node determining that it is attached to a mobile gateway router (figs. 2-3; para 32, lines 1-5), determining a care-of-address that is the home address of the mobile gateway node (para. 32, lines 6-10), sending the care-of-address to the home agent of the mobile node (para. 32, lines 15-19), and maintaining an inherent binding update list of correspondent nodes that the mobile node has been communicating with (para. 32, lines 18-19). Therefore, it would have been obvious to one skilled in the art at the time the invention was made to self-register the mobility of a mobile node with a home agent in the invention of Markki in order to enhance mobility registration by controlling network messages by the mobile node (Malki, para. 54, last nine lines). Further regarding claim 19, the mobile node of Malki is a mobile router (note: the mobile node performs Internet routing functions by forwarding IP packets to correspondent nodes -- para. 9, lines 8-10).

Page 3

2. Regarding claim 20, in Markki the mobile node (fig. 2 MN) is detached from the mobile network (para. 49, lines 1-2).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the

Art Unit: 2666

THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Harper whose telephone number is 571-272-3166. The examiner can normally be reached weekdays from 11:00 AM to 7:00 PM ET.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Seema S. Rao, can be reached at 571-272-3174. The centralized fax number for the Patent Office is 571-273-8300. For non-official communications, the examiner's personal fax number is 571-273-3166 and the examiner's e-mail address is kevin.harper@uspto.gov.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications associated with a customer number is available through Private PAIR only. For more information about the PAIR system, see portal uspto gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
